

The complete online solution for managing casual workers and student employability

keystonetalentbank.com

Talent Bank from Keystone is revolutionising how universities and other educational institutes handle casual and permanent staffing, compliance, timesheet & payroll services whilst enhancing their student employability and careers programmes. Available now on the **Crown Commercial Service (G-Cloud)** framework you can now access Talent Bank without the need for a lengthy procurement process.

Improve compliance and stay 'audit-ready' - Dispense with high-risk legacy processes and disjointed spreadsheet/paper-based controls by moving all compliance into a secure online solution with right-to-work information intrinsically attached to a worker profile. Working hours rules are configurable and system driven, ensuring the risk of breach is eradicated. All worker information is securely accessed in one GDPR compliant and ISO27001 certified service, making light work of audits and reporting. As UKVI and compliance rules change, Talent Bank changes with it, making it easy to ensure all workers remain compliant.

Update timesheets and payroll in one move - Your online Talent Bank portal automatically generates electronic timesheets for temporary workers, all completed and approved by managers online and processed in a matter of clicks. Choose to output a simple timesheet file into your existing payroll service or use Keystone's complete payroll solution - the option is yours.

Improve student employability - offer opportunities to students based on their studies, skills, availability, interests and compliance. Bring the 'job-fair' concept into the 21st century with a solution available 24/7.

Simple, safe - and everything in one place Universities often have a range of spreadsheet and paper-based legacy systems making management of temporary workers time consuming and difficult to track. With a single GDPR compliant online portal for all activity, every department and stakeholder can access the relevant information and systems anytime, anywhere.

Resilient and Scalable - With a secure cloud based ISO27001 certified service - Talent Bank is fully resilient and means your casual workers have access 24/7 whatever happens - ideal for supporting remote and home working with zero on-campus requirement. No software to install and no impact on internal IT requirements.

Highly Customised, White Label Solution - Talent Bank is branded and built to the specification of your institution. Accessed via your own branded website, workers and managers will be interacting via a single online portal built around a proven and robust process flow that matches your internal requirements.
